

## Four ways to print labels

### 1. Ticket:

Online shipping tool hosted in the cloud. Login to a web page and print your labels on a laser- or thermoprinter. Print manually, use the built in Contact List, or avoid punching by importing order information from your ERP-system via csv or xml files.

### 2. Consignor on Premises (COP):

A print server solution. We install our Windows based shipping tool locally in your IT-environment. Import order information from csv or xml files. Installation is normally done via Remote Access.

### 3. Consignor Shipment server:

A web service (API) solution. Powerful API to Direct Link. You use your own interface and integrate with our API to get ready to print labels – in the format you require (PDF, PNG, ZPL etc). Commonly used by Magento and other e-commerce platforms.

### 4. Self-service tool

With a Consignor solution you can easily print customer return labels from Self-service Tool.

## For the programmer

Shipment Server/API - Test account: <https://consignor.zendesk.com/hc/sv/categories/115000066814-ConsignorShipment-Server>

Key: dltest Actor: 6254 (contact Direct Link to get your own private test account)

Specifications, coding samples, technical support for the API
